

With regard to your request for compliance with California Proposition 65 ('CA Prop 65'), we would like to inform you as follows. The following statement applies to every product declaration that we as JEAN MÜLLER provide with regard to our products in relation to CA Prop 65.

Based on the requirements related to CA Prop 65, we have determined that it is not mandatory for the majority of JEAN MÜLLER's products to carry a 'clear and reasonable warning' under CA Prop 65. A warning is only required if there is a risk of significant exposure to the CA Prop 65 substances either in consumer products or through occupational or environmental exposure. The mere presence of CA Prop 65 substances in a product does not require a warning.

As a responsible company, we encourage our customers to familiarise themselves with the CA Prop 65 regulations in order to individually assess their obligations related to the specific use of our products. Understanding the potential exposure of each application is critical to ensure safe use. The responsibility for compliance with CA Prop 65 therefore always lies with the customer.

We therefore ask you to independently evaluate potential measures resulting from CA Prop 65 based on your customer-specific use and the applicable legal requirements and to take them if necessary.

CA Prop 65 status of JEAN MÜLLER products

With regard to requests about the presence of CA Prop 65 substances in the products sold by JEAN MÜLLER, we would like to point out that we are under no legal obligation to provide information. Due to the complexity of the issue, the lack of transparency in supply chains and the challenges described above, it is unfortunately not possible for us to provide a fully comprehensive assessment of individual products.

Nevertheless, we would like to make our contribution to transparent supply chains. Accordingly, we are happy to provide you with information based on our current state of knowledge, which has been determined with the greatest possible care and to the best of our knowledge on the basis of a risk-based approach and is constantly being further developed.

Please note: For requests with regard to CA Prop 65, we will only provide you with the substances listed in CA Prop 65 that are known to us as of the current date and that are contained in the declared product. Whether the presence of these substances in the declared product actually results in obligations under CA Prop 65 is to be assessed independently our customers on the basis of the reasons stated in this document.

If you have any queries, please contact material.info@jeanmueller.de.
