

Environmental policy

Introduction

Jean Müller GmbH Elektrotechnische Fabrik is committed to acting in an environmentally conscious and sustainable manner. Our environmental policy is based on the requirements of ISO 14001 and forms the basis for an effective environmental management system that aims to minimize our environmental impact and make a positive contribution to the environment.

Goals

Our environmental goals are:

1. Conserving resources

We are actively committed to reducing the consumption of natural resources. Through efficient production processes and the use of sustainable materials, we strive to reduce our ecological footprint.

2. Waste prevention and recycling

Minimizing waste is a top priority for us. We promote recycling measures and the reuse of materials in our processes in order to reduce waste and conserve valuable resources.

3. Energy efficiency

JEAN MÜLLER is committed to continuously optimizing energy consumption in all areas of our company. We rely on modern technologies and processes to reduce our energy requirements and use renewable energies.

4. Protection of biodiversity

We recognize the importance of biological diversity and are committed to avoiding negative impacts on local ecosystems. Where possible, we support projects that promote biodiversity.

5. Employee engagement and training

Every employee is an important part of our environmental strategy. We promote awareness of environmental issues through regular training and sensitize our employees to sustainable practices in their everyday work.

Responsibility

Management is responsible for implementing this environmental policy and complying with all relevant legal requirements in the area of environmental protection. All managers are responsible for informing their teams about environmental issues and promoting a culture of environmental awareness within the company. Every employee has the right and the duty to actively contribute to improving our environmental performance. We encourage all employees to make suggestions for reducing environmental impact and to use resources responsibly.

Documentation and review

We document all relevant information within the framework of our environmental management system in accordance with legal requirements and the requirements of ISO 14001. Regular internal audits and management reviews ensure that our system functions effectively and is continuously improved.

Conclusion

JEAN MÜLLER is committed to treating the environment responsibly. With this environmental policy, we are laying the foundation for a successful environmental management system based on resource conservation, waste prevention, and sustainable action. Together, we are working to minimize our environmental impact and ensure a sustainable future for generations to come.
